

How to Download a KML File of the BVBBS Master Box List and Upload It to Google Earth

NOTE: You will need the desktop version of Google Earth to make this work. To download Google Earth, go to <https://www.google.com/earth/versions/> and choose **Google Earth Pro on desktop**.

- Open this link – [BVBBS Box Locations](#)
- In the red box, click the three vertical dots, and choose Download KML
- In the box that appears, you need to do two things:
 - First, across from “Entire map”, click the upside down triangle, then choose the bottom entry, which will be the newest version of the map. **Important:** if you don’t do this step, you will get all versions of the box list and you will see multiple dots for each nest box instead of just one dot.
 - Second, check the box Export as KML not KMZ, click OK, and then Save File. It will be saved to your Downloads folder.
- Open Google Earth and go to File, Open, and choose the BVBBS Master Box List KML file from your Downloads folder.
